

SPEAKER BIOGRAPHY

Jon Dajci

Founder of Dajci Advisory. Enterprise architect and technology advisor.

SHORT BIO

Jon Dajci is the Founder of Dajci Advisory and an enterprise architect specialising in AI, technology strategy, cloud and security. His career spans engineering, financial services, enterprise transformation and large-scale Microsoft environments, including enterprise Copilot and agentic AI adoption.

MEDIUM BIO

Jon Dajci is an enterprise architect, technology advisor and Founder of Dajci Advisory.

His career has taken him from hands-on network and infrastructure engineering through cloud architecture, technology leadership, enterprise transformation and, most recently, enterprise generative and agentic AI.

Jon has worked across aviation, banking, wealth management, insurance and education, helping organisations simplify complex technology estates, strengthen security, challenge suppliers and turn emerging technology into practical enterprise capability.

He speaks about AI, architecture, enterprise technology and what actually happens when ambitious technology strategy meets the reality of a large organisation.

EVENT HOST INTRODUCTION

"Jon Dajci is an enterprise architect and technology advisor whose career spans engineering, cloud, cyber security, technology leadership and enterprise AI. He's worked across banking, aviation, insurance and education and now leads Dajci Advisory, helping organisations make better decisions around AI, architecture and technology transformation. Please welcome Jon Dajci."
